

Visitors to your RE Data Metrix site will look for clarity on what the tool does, who it's for, and how to get started. Below is a ready-to-edit FAQ set tailored to a self-serve SaaS that analyzes real estate deals and compares loan products.

Product basics

These FAQs explain what RE Data Metrix is and how it works at a high level.

- Q: What is RE Data Metrix?
A: RE Data Metrix is an online tool that helps real estate investors analyze individual deals and compare loan options side by side based on profit, cash required, and ROI metrics.
- Q: What types of properties can I analyze?
A: The tool is designed primarily for single-family real estate investments, with support for common strategies like rentals, BRRRR, and fix-and-flip properties
- Q: What loan metrics does the tool calculate?
A: It estimates total cash-out-of-pocket, overall ROI, and annualized ROI for each loan product so you can see which financing structure best fits your goals.
- Q: How is this different from a simple spreadsheet?
A: RE Data Metrix standardizes your assumptions, automates complex loan math, and lets you compare multiple scenarios and lenders in one place instead of manually updating formulas.
- Q: Does the tool replace my underwriter or lender?
A: No, it is an analysis and comparison tool to help you ask better questions and choose smarter loan options; your final terms still come from your lender.

Who it's for and use cases

These address whether a visitor is in the right place and how they might use the product.

- Q: Who is RE Data Metrix built for?
A: It is built for real estate investors who want a clear, data-driven way to evaluate each deal and compare financing options.
- Q: I'm a newer investor—will this be too advanced?
A: No; the tool is meant to simplify the math so newer investors can understand key numbers without building complex spreadsheets.
- Q: Can experienced investors still benefit?
A: Yes; experienced investors can standardize their underwriting, quickly compare loan structures, and scale deal volume with a consistent framework.
- Q: What investment strategies does this support?
A: Common strategies include buy-and-hold rentals, BRRRR deals, and fix-and-flip projects where loan structure and cash to close are critical.

- Q: Can I use this for multiple markets?
A: Yes; We don't use boilerplate data for the entire country. The data is based on state averages. However, you can input your own pricing, rents, and cost assumptions for any deal, anywhere.

Pricing and account details

These FAQs help with friction around cost, trial, and upgrades for a low-touch, self-serve SaaS.

- Q: How is RE Data Metrix priced?
A: Our affordable pricing gives investors full access to our tools and partners for around \$15 a month or \$150 for an annual subscription. That's much lower than many of the tools available to investors.
- Q: Do you offer a free trial?
A: You can start the analysis of your deals to see how easy the process is, but to fully take advantage of the analysis, the lender network, the toolbox, etc, you will need either an annual or a monthly subscription.
- Q: Can I cancel my subscription?
A: You can cancel before your next billing date, and your access will continue through the end of the current period.
Q: Do you offer monthly and annual plans?
A: [Your policy here: e.g., "Yes, monthly for flexibility and annual for discounted pricing if you use the tool regularly."]
- Q: Is there a plan for teams or partners?
A: We don't have an enterprise plan, but members can share some or all of their deals with anyone else on the platform. Add as many paying members to your team as you like. And you can even give them a free month via your referral code. And, you'll get two months free from their paid subscription.

Data, integrations, and security

These reassure visitors about how their numbers and workflows fit into the rest of their stack.

- Q: Is my deal data private?
A: Your deal inputs and analysis are stored in your account and are not shared with other users.
- Q: Can this connect to my CRM or marketing systems?
A: This is a feature under consideration for future implementation.
- Q: Can I export my analyses?
A: Yes. You can download a PDF showing the analysis. You can also share your analysis with other paying members on the platform.
- Q: Do you store my lender offers or term sheets?
A: The tool focuses on modeling loan structures and terms you enter or provided by the

lender; it does not act as a lender or originate loans. You can save your preferred lenders in your portal.

- Q: How accurate are the results?

A: Results are based on the numbers and assumptions you provide, along with standardized formulas for profit, cash required, and ROI; they are estimates, not guarantees.

Support and getting started

These FAQs reduce signup friction and explain what happens after a visitor creates an account.
library

- Q: How do I get started?

A: Create an account, add a property, enter your assumptions, and then compare loan options to see profit, cash to close, and ROI for each scenario.

- Q: Do you provide any templates or example deals?

A: [Your policy here: e.g., "Yes, we include sample deals and default assumptions so you can learn by tweaking real examples."]

- Q: What kind of support do you offer?

A: Support is available via email or in-app chat for help with account issues, feature questions, or deal setup.

- Q: Do you have training or tutorials?

A: We provide short walkthroughs and help articles that show you how to set up your first deal and interpret the outputs.

- Q: How can I share feedback or request features?

A: You can submit feature requests or feedback directly via the contact us selection or by emailing our support team.
